**Re:** Commingling Application  
Plan 6 SU A  
Tigre Lagoon Commingling  
Facility No. 1  
(Facility Code 93571)  
Tigre Lagoon Field  
Vermilion Parish, Louisiana

Dear Sir:

Application is hereby made on behalf of Forest Oil Corporation (Forest) for the calling of a public hearing to request approval for the commingling of production from the Plan 6 SU A, established by Office of Conservation Order No. 192-L, effective April 28, 1970, in the Tigre Lagoon Field, Vermilion Parish, Louisiana at the applicant's commingling Facility No. 1 (Facility Code 93571):

1. To grant authority to commingle hydrocarbons produced from current and future wells on the Plan 6 SU A at Forest's Commingling Facility No. 1 (Facility Code 93571), in the Tigre Lagoon Field, Vermilion Parish, Louisiana with those units or leases previously approved for commingling at the Facility by Office of Conservation Order No. 192-5, effective January 29, 2002.
2. To authorize the use of periodic well tests for the measurement and allocation of production to said wells and units.
3. To grant such exceptions to Statewide Order No. 29-D-1 as are required by the proposed procedure and to grant such additional authority and approval that may be needed for such procedure.
4. To grant approval of this commingling facility for the existing leases and units and for future units composed partially or wholly of said existing unit and leases.
5. To consider such other matters as may be pertinent.

Forest's Commingling Facility No. 1 (Facility Code 93571) has been previously approved for the commingling and allocation of

production for other units and leases in the same manner requested above. Additional authority is herein requested due to re-establishment of production from the Plan 6 SU A in the recently re-completed Forest - E. Broussard Heirs No. 1 well (WSN 225835).

The applicant proposes to commingle production from the subject units and leases at its Commingling Facility No. 1 and will accomplish commingling and allocation in the manner set forth in the narrative explanation and as shown and explained on the exhibits attached hereto and made a part hereof.

It is the opinion of Forest that the commingling of gas and/or liquid hydrocarbons and the use of periodic well tests for allocation of production in the manner proposed will provide reasonably accurate measurement, will not create inequities, and will afford the owner of any interest the opportunity to recover his just and equitable share of production.

Attached hereto and made a part hereof are:

Exhibit A: Narrative explanation of the manner in which commingling will be accomplished;

Exhibit B: Process flow diagram of Commingling Facility No. 1;

Also enclosed is a list of the names and addresses of the Interested Owners, Represented Parties and Interested Parties to whom a notice of the filing of this application will be sent. Pursuant to the Revised Rules of Procedure, such list of parties is being furnished only to the Commissioner of Conservation; however, the list of parties will be provided to any party requesting a copy of it. A reasonable effort was made to ascertain the names and addresses of all Interested Owners, Represented Parties and Interested Parties.

Finally, enclosed is our check on behalf of the applicant made payable to the Office of Conservation and representing the required docketing fee.

Very truly yours,

LOUIS GILBERT & ASSOCIATES, INC.
